

MADESH A

FULL STACK DEVELOPER

PROFILE ME

I am currently pursuing my Engineering degree(B.E.CSE) in Sri Eshwar College of Engineering. I constantly developing my skills to implement in projects and so much interest to learn new things daily and I promise you to keep my consistency to do my work using my skills efficiently and effectively.

PROJECTS

AUTOMATIC TICKET VENDING MACHINE

Me and my team mates developed a project for a people who was not willing wait for buying a train ticket. this software helps them to take a ticket within a minute and saves their time. our software makes the customers comfortable to use. we used java and my sql to implement in our project with the help of JDBC connectivity.

CERTIFICATE VALIDATION USING BLOCKCHAIN

The main motive of this project is to validate your certificate your certificate with the help of our blockchain technology. this helps many institutions to identify the certificates whether it is original or fake one. We used polygon mumbai matic in Blockchain Technology.

EXPENSE TRACKER

I am recently developed a project for expense tracker,that helps you to calculated your monthly salary and expenses with its percentage for savings that are shown in the front page. I developed it using mern stack.

SKILLS

I have learnt the programming languages such as C program,Java and Python.For database connectivity, I have learnt query Languages like SQL(structured Query Language) and MongoDB for Backend connectivity. I also have interested to develop webpages.so, I learnt web technologies such as HTML,CSS,Javascript,Reactjs,Nodejs,Expressjs.

ACHIEVEMENTS

Me and my teammates won first prize in mini project expo for the project of Certification validation using blockchain using polygon matic mumbai and that was held in my college.

CERTIFICATIONS

I completed Java beginners to advanced and Data structures and algorithms courses in udemy and they awarded me a course completion certificate. Then, I got the certificate for succesfull completion of my database SQL course in Sololearn,Hackerrank,Skillrack. recently, I was awarded by Grasshopper for successful completion of Javascript basics.
